

Position Title: Biogas Compressor Technician  
Location: North America, Remote  
Reports To: Field Service Manager, North America

---

## Summary

Greenlane Renewables Inc., headquartered in metro Vancouver, Canada, is a pioneer in the rapidly growing renewable natural gas (“RNG”) industry. As a leading global provider of biogas upgrading systems, we are helping to clean up two of the largest and most difficult-to-decarbonize sectors of the global energy system: the natural gas grid and the commercial transportation sector. Our systems produce clean, low-carbon and carbon-negative renewable natural gas (RNG) from organic waste sources including landfills, wastewater treatment plants, dairy farms, and food waste. Greenlane is the only biogas upgrading company offering the three main technologies: waterwash, pressure swing adsorption, and membrane separation and has over 30 years industry experience, patented proprietary technology, over 100 hydrogen sulfide treatment systems sold, and over 140 biogas upgrading systems sold into 19 countries, including many of the largest RNG production facilities in the world. Greenlane is a publicly-traded company on the Toronto Stock Exchange (TSX: GRN).

We are currently seeking a Biogas Compressor Technician that will be responsible for maintaining, troubleshooting, repairing and operating compressors. This position is responsible for the safe and proper operation, maintenance, and repairs of the Renewable Natural Gas (RNG) facilities' mechanical, instrumentation, and electrical equipment.

## Duties & Responsibilities:

- Performance of maintenance and repair of all company compressors.
- Perform routine and preventative maintenance, inspections and repairs on rotary screw and reciprocating compressors; also including all ancillary equipment relevant to the operation of aforementioned compressors.
- Ensure all compressor preventive maintenance requirements are recorded and can be scheduled periodically.
- Conduct sufficient operator training such that they can maintain, repair, and recondition industrial compressors, air compression systems and in line dryers on location.
- Assist with new installation, plumbing, and startup of compressors and air dryers.
- Install and provide maintenance on industrial sized gas and air compressors.
- Generate repair work orders that address the deficiencies in the need of correction on industrial compressors.
- Maintain compressors, motors, pumps, and valves associated with operations.
- Monitor/Operate RNG facilities, identify issues, and make necessary changes to ensure steady operations of the facilities
- Understand and support QHS goals, objectives, and ongoing improvement plans and activities.
- Complete work orders and ensure all maintenance work is done by established safety rules.
- Perform validations and repair of PH sensors, Pressure, Temperature, and Flow transmitters.

- Ensure proper record keeping of validations in equipment data files.
- Perform preventive maintenance on fresh water and effluent systems, air systems, heat exchangers, and pumps.
- Diagnose and repair electrical power and control systems.
- Use tools ranging from common hand tools and power tools to precision measuring instruments and electronic testing devices.
- Support other Service & Commissioning activities as required.
- Strive to grow and develop skills.

**Qualifications and Experience:**

- Relevant maintenance and operating experience in an industrial or gas processing environment is desired.
- Operational experience may be supplemented with military experience or training in a related field.
- A relevant background in safety procedures/practices.
- Able to quickly respond to rapidly changing conditions.
- Able to read and understand mechanical and electrical drawings.
- Able to analyze and interpret data and make sound recommendations on plant conditions.
- Fundamental proficiency in Windows-based applications (Outlook, Word, and Excel) on a PC or tablet required.
- Valid driver's license and ability to operate a motor vehicle in US and Canada is required

We are committed to transparency in our hiring process. We will be offering a base salary of \$85,000 - \$100,000 based on a candidate's qualifications and experience.

**How to Apply:**

We are an equal opportunity employer and invite applications from all qualified individuals. To be considered for this role please apply through the Greenlane Renewables page on LinkedIn and attach your resume. While we thank all interested candidates only those who are short-listed will be contacted.
